SOFTWARE FOR TEXTILE, APPAREL & FASHION TEAMS

Seven applications. Start with your work.

From product development to operations and customer experience, choose the task your team wants to move forward.

INSIDE DAISY / DESIGN & PRODUCT DEVELOPMENT

Review a wash idea, front and back.

Actual Daisy workspace, shown with a fictional denim design.

Start with one task your team handles every day. Explore the output, then discuss how it could fit your work.

FOR TEXTILE, APPAREL & FASHION TEAMS

Find your team's starting point.

Choose the role and task closest to your work. Click an application name to explore the product.

01

Daisy

Explore product

DESIGN & PRODUCT DEVELOPMENT

Compare design and wash alternatives so the team can choose what to take into sampling.

Example output: Front/back visuals, version notes and a draft tech pack.

02

Fabia

Explore product

FABRIC SOURCING & DEVELOPMENT

Turn a fabric brief into a shortlist you can compare against your requirements.

Example output: Fabric comparison, sample and quotation follow-up.

03

Orain

Explore product

MERCHANDISING & OPERATIONS

Review recorded order status and spot missing information that needs follow-up.

Example output: A sourced order summary and production-stage records.

04

Quai

Explore product

QUALITY & INSPECTION TEAMS

Keep measurements, defects and photos together for your quality team to review.

Example output: An inspection report with findings and photo evidence.

05

Maria

Explore product

BRAND & MARKETING TEAMS

Use brand and product facts to prepare content for the channel you are working on.

Example output: Instagram copy, email drafts and product descriptions.

06

Carin

Explore product

CUSTOMER SERVICE TEAMS

Draft replies from approved product and support information; identify questions that need review.

Example output: A reply draft, supporting sources and questions to resolve.

07

Claire
